

APPROVED BATTERY OPTIONS STATEMENT

This statement covers all the GoodWe energy storage products, including ES, EM, BP and SBP series. Please find details below.

Only the batteries listed below are approved for connection to GoodWe. Please find the specific models in the following table, which are subject to change without notice.

Brand	Model
BYD	B-BOX2.5
	B-BOX5.0
	B-BOX7.5
	B-BOX10
	B-BOX13.8
LG	RESU6.4EX
	RESU10
	RESU6.5
	RESU3.3
PYLON	US2000A
	US2000B*1
	US2000B*2
	US2000B*3
	US2000B*4
	US2000Plus*1
	US2000Plus*2
	US2000Plus*3
US2000Plus*4	
GCL	GCL 5.6KWH*1
	GCL 5.6KWH*2
	GCL 5.6KWH*3
	GCL 5.6KWH*4
ALPHA	SMILE5-BAT

Note: GoodWe will not provide technical support for installations where non-approved batteries are installed.

While our products ES, EM, BP and SBP are technically compatible and capable of achieving good results with lead-acid batteries, newer-technology Lithium-ion batteries with direct communication to the charging device are the preferred battery choice. Lead-acid and other similar older-technology battery types require experienced and precise design, installation and maintenance to work effectively and efficiently. If any of these factors are inadequate, it may result in battery failure. Customers should always make sure that they engage an experienced solar installation designer and installer to ensure that the ES, EM, BP and SBP series products are installed, maintained and used effectively and efficiently.
